Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$665.00
 - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$240.00
 - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$320.00
 - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Allowable Subject Matter

1. Claims 19-29 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 19, 20, and 21 are allowed for the reasons as indicated on the previous office action 3/28/03, in paper no. 4.

The combination of a substrate provided with a heat generating member for creating a bubble in the liquid and a movable member arranged on said substrate in said liquid flow path, the movable member having a free end on said discharge port side to face said heat generating member, and said free end being positioned downstream of the area center of said heat generating member, wherein said movable member is formed by silicon nitride multilayered film with the composition being changed or impurities being added thereto, recited in claim 24. This invention solves the problem of precise alignment of each liquid flow path, because there is no need to position the movable member with the substrate. It is the combination, which is not taught or suggested in the prior art, which make the claims allowable over the prior art.

The combination of a substrate provided with a heat generating member, and a cantilevered member arranged to face said heat generating member with a specific gap therebetween, said movable member being formed from either one of silicon nitride, diamond, amorphous carbon hydride, and silicon oxide, and being fixed to said substrate, recited in claim 25. This invention solves the problem of precise alignment of

each liquid flow path, because there is no need to position the movable member with the substrate. It is the combination, which is not taught or suggested in the prior art, which make the claims allowable over the prior art.

This invention solves the problem of precise alignment of each liquid flow path, because there is no need to position the movable member with the substrate. It is the combination, which is not taught or suggested in the prior art, which make the claims allowable over the prior art.

The combination of providing a substrate with a heat generating member, and with a cantilevered type movable member arranged to face said heat generating member with a predetermined gap therebetween, wherein said movable member is provided on said substrate by a photolithographic method, recited in claim 28. This invention solves the problem of precise alignment of each liquid flow path, because there is no need to position the movable member with the substrate. It is the combination, which is not taught or suggested in the prior art, which make the claims allowable over the prior art.
